

By integrating these new features and enhancements, Come2Top aims to create a richer, more engaging gaming environment that encourages increased participation on the platform.

1. Unlimited Ticket Ownership:

In the new mode, multiple players can own shares of a single ticket. For example, ticket number #14 could have hundreds of co-owners, increasing overall participation and engagement. This leads to larger locked assets, enhancing the reward, and the excitement of the game.

2. Cheaper Tickets:

In the new game mode, tickets will be much more affordable. The number of tickets will be kept at 256, compared to other game modes (e.g. sponsored mode) which is 64, allowing a wider range of participation. Ownership is divided based on the initial investment, starting from just 1 FRAX. This accessibility is designed to attract more players and boost engagement, as anyone can join the game with minimal investment and still stand a chance to win larger rewards.

3. Owners Challenge:

Ticket owners can challenge each other in interactive games such as Rock Paper Scissors (for 2 players) and The Odd One Wins (for 3 players). These challenges will use zero-knowledge proofs to ensure fairness and security, preventing any form of cheating. The stakes in these games are high as winners can steal tickets from the losers, adding a competitive edge and a strategic layer to the game.

4. Clan Option:

Players can form or join clans, with each clan limited to a maximum of 5 members. Clan members share profits based on a weighted arithmetic mean. If a member loses their tickets, their coefficient is adjusted to $1/(\text{users} * \text{tickets})$, distributing the loss across the clan. This feature encourages collaboration and strategy, as players work together to maximize their collective success and mitigate individual losses.

5. Bonus Ticket Mechanism:

In this mode, 1 ticket, which is our Golden ticket, is allocated to the most active users based on leaderboard performance during the ticket-buying phase. The allocation is split with 4/9 going to the first place, 3/9 to the second, and 2/9 to the third. This ticket would be funded from the game's combined treasury fund for the community and Come2Top itself, from which funds are temporarily allocated to specific tickets. This mechanism rewards active participation and engagement within the community, while the winners can accumulate higher profits in subsequent stages but cannot withdraw the base money.

6. Offer Mechanism:

The offer mechanism remains in place in the new game mode. More owners can utilize portions of a ticket from the offer, leading to increased interaction and user satisfaction. The 10% additional payment is no longer required; instead, the value of the ticket portion owned by user A is automatically deducted, and the user acquires ownership of that portion. This streamlines transactions and encourages more participation in the offer system.

Game Mode Enhancements

The Classic Mode will remain available with significant enhancements. It can now be customized for sponsorship opportunities, allowing for larger prizes and high-stakes games. Special events can be introduced to attract more participants, boosting overall engagement and TVL. Performance and security improvements ensure a seamless gaming experience, while enhanced community features promote social interaction and strategic alliances. These enhancements make the Classic Mode more appealing, ensuring it remains a core part of Come2Top while catering to both casual players and high rollers.

Stay tuned for more updates and join the excitement!
